

Office

The Guru of Office Slides

Designing, developing and manufacturing functional hardware products for the Office Furniture Industry has always been at the core of Repon's business.

Repon's vast experience and deep knowledge gained by working—over many years—closely with some of the world's best known names in office furniture, uniquely positions Repon to meet and, indeed, surpass the most demanding requirements of office furniture making OEM's. Repon's wide range of office products include: pedestal, vertical and lateral file cabinet slides, keyboard trays and slides for receding doors. We at Repon specialize in providing a broad selection of applications such as front and rear anti-tilt and anti-lock product, as well as "soft close", TTO (touch-to-open) and a unique "easy down" feature. In fact, Repon is perhaps the only company in the world today capable of so fully customizing its production line to meet its customers' demands, both in terms of capacity and over-all product quality. And sometimes, we even know what you need before you do! After all, we are the office products Guru, and we are at your service!

Front Interlock

160 lbs NJ-77Q05
